## Method of Installation

### Installation of the motor and remote control holder on the wall

- Remove the motor from the packaging.
- Place the wall fan at the desired place for installation, then drill for holes on the wall with the measurement shown in (figure 1).
- Align the four holes on the DC motor frame to the four holes on the wall, then insert the expansion bolt into the four holes and insert the four M5\*40 screws into the holes and tighten securely (figure 3).
- Place the remote control holder at the desired place for installation, then drill four holes on the wall with measurement shown in (figure 2). Then take the M3\*20 screws and tighten securely.

### Assembly of Net Cover and Fan Blade

- Assembly of rear net covers:
  - Remove the Nut of the blade and four M5\*10 screws from the front of motor
  - Align the four small holes of the rear net cover to the four screw holes of the motor.
  - Use the four m5\*10 screws to secure the rear cover to the motor (figure 4).
- Assembly of blade:
  - Remove the protective sleeve on the motor shaft.
  - Insert the center of the blade into the shaft and take the plastic Nut and tighten on an anti-clockwise direction (figure 5).
- Assembly of front cover:
  - Loosen the screw at the bottom of the net cover.
  - Place the security lock downwards, then insert the front cover into corresponding Position of the net frame.
  - Adjust the alignment of the front and rear net cover carefully.
  - Then tighten the screw of of the security lock. (figure 6)
